AlphraMedic AB - 21 year
2004-2025

AlphraMedic AB has extensive experience from sales and manufacturing of products to different users. AlphraMedic manufactures and supplies products within First Aid to retailers in Scandinavia and the rest of Europe.

AlphraMedic AB manufactures i.e. different types of holders, dispensers and kits for First Aid products. The production consists of partly in-house developed products and partly products manufactured according to customer wishes.

AlphraMedic AB's business concept is to satisfy our customers with a wide range of First Aid products such as:

Dispensers and Holders, Plasters on a roll or Plaster strips, Gel dressings, Burn products, Blood stop spray, Wound plaster spray, First aid bags (soft/hard), Refill range, etc.

Contact us if you have products that must be customized to best suit the market and your customers!

Contact us if you would like more information about products and ÅF prices!

With Best Regards
AlphraMedic AB

Place e.g. DIN kit 13164 in one side and in the other side e.g. Burncare products and other products such as Blood Stop spray, Wound Plaster spray, Eyewash 250ml alt. 50ml, Pharmagel, Suture tape, Surgical tape, Waterproof plaster, Plaster refill, Long plaster, Bandage, Wound wipe, etc.

Ref. No. 5733

WOUND PLASTIC SPRAY

Wound plastic spray is an aerosol with quick-drying wound dressing that provides quick and safe protection. It is made to protect minor wounds and injuries such as lacerations, abrasions and cuts at workplaces, playing sports and at home.

Wound plastic spray reduces the risk of infection, protects against water and dirt, which provides safe showering and staying in wet environments or dusty and dirty workplaces, simple, convenient and safe to use, good in areas where it is difficult to use ordinary plasters and bandages.

Ref. No. 3140 60ml

BLOODSTOPP SPRAY alginat

BLOODSTOPP-alginate spray is an aerosol with blood-stopping powder. The active substance - calcium alginate - forms a powder layer over the injury. The alginate layer absorbs blood from the wound and exudate forms, forming a cooling, gel-like mass, which aids in the healing process. Chamomile and calendula extract, Seaberry oil, Aloe Vera and Jojoba wax provide a natural moisturizing of the damaged area and help in the healing process.

It is made to stop minor bleeding from superficial injuries such as lacerations, abrasions and cuts at workplaces, playing sports and at home.

Press the spray button for a few seconds and cover the damaged area. Spray from a distance of approx. 15-20 cm.. For repeated treatment, shake the bottle thoroughly each time.

Ref. No. 3130 60ml

BURN PLASTER

Pharmagel hydrogel dressing moist wound healing

*Treatment of burns and after-treatment of burn injury**

- Pharmagel is a transparent polyurethane gel compress - 60% water
- Pharmagel Burn plasters cool, relieve and reduce pain
- **NOTE!** Wash the wound clean before application. It must be **Dry and Clean!**
- Moist wound healing accelerates the formation of new tissue
- The healing process can be followed without removing the dressing
- Does not stick to wounds and has a good dampening effect
- The compress has a self-adhesive polyurethane film
- Apply to the burn, covering the entire wound surface
- The compress can be applied up to 1 week
- Minimizes scarring and scabbing
- Individually wrapped and sterilized
- Allows free passage of gases and water vapor
- Protects the skin from dehydration
- Pharmagel is waterproof, enabling safe showering

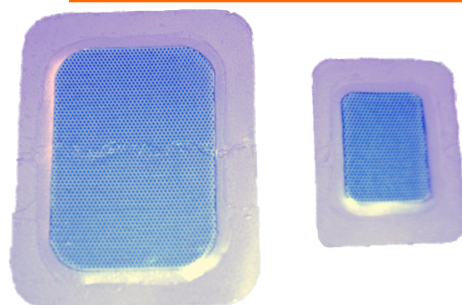

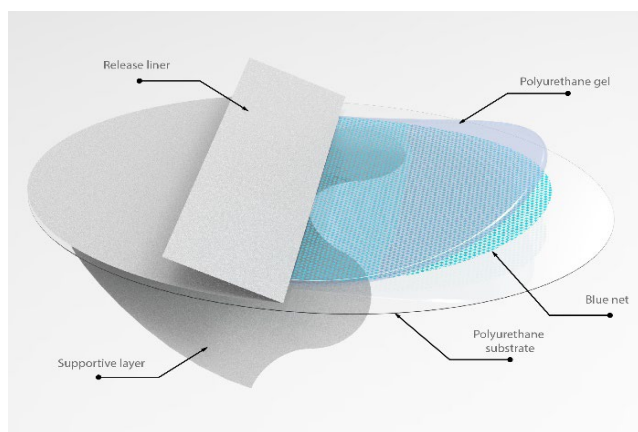

•A burn is primarily treated with **Burncare gel** and gel compresses for up to **two** hours. (alt. cool water)

With **Burncare** you achieve three advantages:

- 1) Cooling to minimize tissue damage,
- 2) Pain relief for increased comfort
- 3) Reduces the risk of additional offensive infection.

After this, **Burncare** has "done its thing". For continued wound healing, **Pharmagel** compresses are used

For minor burns, you can of course use Pharmagel directly for quick treatment and relief.

Size: 45x65mm; 75x100mm

AlphaMedic

Eyewash spray

EyeWash - triple

Buffered sodium chloride solution 9%

EyeWash spray eye-shower for the treatment of eye damage, burns and wound washing.

The spray contains 250ml of buffered sodium chloride solution 9mg/litre.

Flushing time - 15 minutes / spray

Eye injuries:

In case of corrosive eye injuries, it is very important to act quickly treatment, preferably within a few seconds.

Flushing time for acid corrosion injuries is normally about 5 minutes.

Flushing time for alkaline corrosion injuries is at least 20-30 min.

In the case of serious corrosion damage, it is important to quickly seek medical attention and then it is important to rinse all the way during transport to the eye-Doctor. It is therefore necessary to include sufficient flushing time.

AlphaMedic's **EyeWash triple** is a bag that contains 3 eye shower sprays that give 45 minutes flushing time. It is easy to quickly remove the bag from the wall bracket and take it with you during transport.

At the workplace, the bag must be within "reach" where there is a risk of that an eye injury may occur. It must be positioned so that can reach it within a couple of seconds.

ATTENTION! When the spray is opened and the seal is broken, the spray should only be used for washing wounds or cooling burns. As the seal is broken and the spray used, full flushing time cannot be guaranteed.

BURN PRODUCTS

Burncare 3,5 gr gel.

Tear open the bag and squeeze the contents over the burn. Let it be as thick a layer as possible. Don't rub it out. In case of damage to the fingertip: Put the finger in the sachet and leave in the sachet, until the pain subsides. If necessary, seek medical attention

Burncare 50 ml och 120 ml gelspray.

Spray the contents liberally over the burn. Let it be as thick a layer as possible. Do not rub the gel. Cover if the burn area with a wound compress. If necessary, seek medical attention.

Burncare 5x5cm, 10x10cm, 20x20cm, 30x40cm (face mask) och 40x60cm compress

Tear open the bag and take out the compress and put it over the burn. Squeeze out all the gel. Make sure the compress covers the entire burn-area and 1-2 cm beyond this. Place the empty bag over the compress and fix with e.g. First aid bandage / alt. Super Soft. Leave the compress on for 2 hours. In case of damage to e.g. one hand: Put your hand in the bag and seal the opening. In the case of a burn on the arm or leg: Open the package at both ends and thread through arm or leg. Seal the bag at both ends. Larger/deeper burns seek medical attention.

Burncare 25 gr gel tube

Squeeze the contents over the burn. Let it be as thick a layer as possible. Don't rub it out. Cover if the burn area with a wound compress. If necessary, seek medical attention

ThermaPatch

Body warmer

Description:

ThermaPatch is an easy-to-use body warmer that generates heat upon contact with air for 8 to 12 hours.

The patch is equipped with adhesive zone for easy application.

Mode of action:

Natural heat is generated due to air-oxidation of the Patch's ingredients upon contact with oxygen in the air. Heat causes vasodilatation and increases local blood flow, which results in pain relief and increased elasticity of connective tissues, which promotes healing, relaxes muscles, reduces muscle spasm and stiffness, and increases the flexibility and range of motion of muscles and joints.

Heat often facilitates exercise in patients with arthritis.

Women with primary dysmenorrhea may obtain relief by applying heat to the lower back or abdomen. Plus, penetrating heat helps relax stiff, sore, aching muscles and joints helping to restore movement. Heat increases blood flow to the affected area providing oxygen and nutrients to aid the healing process.

Features:

- **ThermaPatch** provides up to 12 hours of steady warmth.
- Relaxes tight muscles and releases tension.
- Easy to use with a noticeable impact.
- Air-activated, no electricity.
- Non-medicated and fragrance free.
- Safe for users who can't take analgesics due to their side effects.
- Most effective when used according to the instructions for use.
- Available in large sizes for back and shoulder pain.

Intended Purpose:

ThermaPatch is used for pain relief in muscle and joint pain through providing well-tolerated comforting warmth.

ThermaPatch is indicated for the following:

- To keep different body parts warm during cold.
- As a physical therapy for pain relief in case of joints aches, sprains, arthritis and lower back pain.
- For arthritis and joints, back and shoulder pain.

Pharmapore – Sterile **NEW**

Nonwoven wound dressing

Description

Pharmapore sterile combines a low-adherence, highly absorbent wound pad with a soft, formable material for a simple and effective treatment of wounds.

Benefits

- Individually packed in resealable bag and sterilized with EO gas.
- Soft dressing that breathes.
- Highly absorbent and malleable wound pad.
- Hypoallergenic glue.

Safe and secure fixation

- Hypoallergenic glue that allows the skin to breathe to protect the skin from maceration.
- This results in a safe and secure fixation of the dressing.

Soft and formable

- Soft and formable Nonwoven material ensures patient comfort and easy application on hard-to-reach and non-smooth wound sites, e.g. forearms and shoulders, hands and fingers

Patient comfort

- Thick wound pad prevents fluid from penetrating and protects the wound from trauma.

Uses

- Pharmapore sterile is ideal for post-operative use, cuts, lacerations and sutured wounds.

PHARMASTRIP

Suture tape - cuts

NOTE! 6pcs strips/envelope

Size: 6,4x76mm

Flexible skin closure strips made of polyamide, non-elastic body coated with a pressure-sensitive, hypoallergenic adhesive.

- Breathable, porous, non-elastic carrier can be used on contoured areas on the body or where bending and movement occur.
- White color for a cosmetically pleasing appearance.
- Eliminates marks that after stitches and staples, give a better cosmetic result than sutures or staples.
- Quick and easy to apply to save time.
- Hypoallergenic adhesive.
- Packed in sealed bags E.O. sterilized.
- For use in highly profiled areas or areas of the body with movements in muscles and joints.
- Provides wound support after early suture or staple removal.
- Useful for wound support post-operatively and after suture removal.

RESCUE BLANKET

Gold / Silver

160x210cm

The life-saving blanket can e.g. be used in industry, in traffic, workplaces and leisure. And also very suitable in the event of accidents, burns and storms. However, the face must not be covered.

Uses

Protection against cold: The silver side should be facing inwards. The silver-colored surface reflects upwards of 80% of body temperature. Hypothermia and freezing are prevented in this way.

Protection against heat: The silver-colored surface should face outwards. The sun's rays are reflected and keep the body cool. Can also be conveniently used for the car, tent, etc.

Art. nr 3161 160x210cm

BLOOD STOP - BANDAGE

Gauze / Wound compress

Blood stop bandage is a first aid dressing. It is a combination of a silicone-treated wound pad to avoid getting stuck in wounds, as well as a porous gauze bandage of 400 cm. A practical dressing for the treatment of bleeding wounds.

Blood stop bandage can also be used as a pressure bandage in case of major bleeding by combining with an extra gauze bandage over the bleeding.

VENDAPRESS Self-adhesive flexible bandage

Elastic bandage as support for sprains

Description

This product is constructed from a combination of the elastic and high strength of the polyester fiber and a latex coating that allows surfaces that are self-adhesive. You can't feel any stickiness on either side of the bandage, but it completely adheres to itself. Does not stick to skin, fur or wounds.

Benefits

Tear off, it can be torn off very easily and smoothly
Can be used in different thicknesses and for all body parts if needed
Self-adhesive, no need for staples or tape
Retains its original size - does not shrink
Elasticity, very good elasticity, and good stretchability
The bandage breathes
Quick and easy to remove, leaving no sticky residue

Uses

Fixation of e.g. burn compresses
Elastic bandage, plaster bandage and protective bandage during assembly work.
First aid product for e.g. sprains and strains

FIRST AID CASES

With wall bracket

Size: 31x21x12cm

A practical first aid case in impact-resistant ABS hard plastic with wall mount. This means that you can quickly take the case to an injured person for quick treatment.

The case has double inner lids to keep the products in place. Due to its clarity, it is easy to see what is there and when it needs to be topped up.

Design the case yourself for your own workplace by choosing products in addition to the standard range or only with products outside Din 13164.

Suitable for both large and small workplaces, sports arenas, boats and ships, the transport industry, rescue vehicles, etc.

Content
